**LES PAPETERIES DE VIZILLE
VIZILLE PAPER MILLS
HIGH PERFORMANCE
FOR YOUR SUCCESS**

> PAPER IN EVERY SHAPE AND SIZE

In Vizille, at the heart of the Grenoble area, and papermakers for over 400 years, we belong to the cement group Vicat. This structural and financial security, coupled with our know-how, have allowed us to focus on our profession and on innovation.

OUR HISTORY

At the end of the 16th century, the first paper mills emerged on the Vizille plane. Starting in 1824, several machines arrived in different versions, improving our productivity and product quality. Since 1984, Papeteries de Vizille have been part of the Vicat Group.

Production capacity

30 000 tons
per year for the paper production activity.

80 million
sacks per year for the sack activity.

4,700 MWh
of electricity.

OUR COMMITMENTS, OUR VALUES

Our core domestic and export businesses:

- > The production of paper for printing, high-security, packaging, graphics and other specialty applications
- > Production of medium and high volume kraft sacks

Located in a natural park of 16 hectares, we are committed to meeting your needs thanks to the know-how of our people and the performance of our production equipments, guaranteeing high-quality product.

With our concerns for environmental protection, we have been committed to a sustainable development programme for many years now.

Our FSC and PEFC labels, our biomass unit, our hydroelectric production, are all part of this commitment.

Our 150 employees are there to listen to you and guide you towards the solutions that best suit your projects.

> OUR PRODUCTS

THE SACK ACTIVITY TO EACH CLIENT HIS SACK

The sacks activity offers a range of customised kraft sacks, with high characteristic papers (high level of porosity, no skid, high rupture energy) for industrial markets such as construction (cement, rough cast, plaster), seeds, minerals, chemical, human food (sugar, flour, potatoes, etc.) and animal food.

We offer the following configurations:

- > Medium and high volume sacks,
- > Sacks with valves or open-mouth
- > With specific devices (handle, quick-opening, etc.)
- > Food-contact, biodegradable, repulpable, etc.

We develop the sack that you need for your particular applications together.

Our structure and flexibility allow us the reactivity the sack market demands.

We propose effective tracking of your orders thanks to our dedicated, unique sales administration set-up and additional services such as:

- > availability and monitoring of stock,
- > graphic creation aid,
- > technical visits, etc.

OUR PAPER BUSINESS: YOUR PAPERS CUSTOMISED

The paper activity covers the publishing, food packaging, security, luxury and industrial markets. Our products offer a wide range of technical characteristics. Colours, textures and substance can be adjusted according to your specific needs.

→ **SECURITY**
